1. Introduction

Bayport Veterinary Clinic Management System (VCMS) is a web-based application that helps Bayport Veterinary Clinic manage daily operations: pet and owner records, appointments, clinical consultations, prescriptions, billing, inventory, and email reminders.

The system can run as a desktop application (offline-capable at the clinic) or as a cloud deployment accessible through a web browser. Staff sign in with a role-specific account so each user sees only the menus and actions relevant to their job.

2. System Requirements

2.1 Cloud (Browser)

- Modern web browser: Google Chrome, Microsoft Edge, or Firefox (latest version)
- Stable internet connection
- Screen resolution 1280 x 720 or higher recommended

2.2 Desktop Application

- Windows 10/11 or macOS 11+
- 4 GB RAM minimum (8 GB recommended)
- 500 MB free disk space
- Optional: USB receipt printer for POS (configured in Settings)

3. Getting Started - Sign In

1. Open the Bayport login page (desktop shortcut or <https://bayport-vet-clinic-com.netlify.app>).
2. Select your role: Admin, Vet, or Front Office.
3. Enter your username and password provided by the clinic administrator.
4. Check the Terms and Conditions box, then click Log In.
5. If prompted for a one-time passcode (OTP), enter the 4-digit code sent to your email.
6. On first cloud visit, wait for the blue banner 'Waking up server' to disappear (up to one minute).

Default training accounts (change passwords after go-live): admin/admin123, vet/vet123, frontend/frontend123.

4. User Roles and Access

Role	Primary responsibilities	Key modules
Administrator	Full system control	All modules + Users, Reports, Settings, Logs
Veterinarian	Clinical care	Pets, Appointments, Consultations and Rx
Front Office	Reception and checkout	Pets, Appointments, Billing, POS, Inventory, Reminders

The left sidebar shows only modules your role can access. If you need additional access, contact an administrator.

5. Dashboard

After login, the Dashboard displays clinic information, quick-action buttons, and summary statistics (pets, appointments, prescriptions, users). Quick actions vary by role - for example, veterinarians see shortcuts to start consultations; front office staff see POS and billing links.

6. Pet Profiles

1. Open Pet profiles from the sidebar.
2. Click Add pet (or Edit on an existing card) to open the form.
3. Enter pet details: name, species, breed, age, gender, and optional photo (webcam or upload).
4. Enter owner information: name, phone, email, and address in the same form.
5. Complete the health profile: allergies, current medications, last vaccination date.
6. Optionally add medical history records.
7. Click Save. The pet appears in the list; use search and filters to find records quickly.

Click a pet card to open the full Pet profile page with vaccination schedule and history.

7. Appointments

1. Open Appointments from the sidebar.
2. Click Book appointment and select pet, date, time slot, visit type, and assigned veterinarian.
3. New requests start as Pending until approved.
4. Administrators and front office can approve appointments; veterinarians see their own schedule.
5. After the visit, mark the appointment Done.
6. Use the calendar view for a monthly overview of scheduled visits.

8. Consultations and Prescriptions

Available to Administrators and Veterinarians only.

1. Open Consultations and Rx from the sidebar.
2. Start consultation: select a pet (often from an approved appointment).
3. Step 1 - Diagnosis: enter clinical findings and notes.
4. Step 2 - Procedures: add billable procedures from the fee catalog.
5. Step 3 - Prescriptions: complete the Rx pad (medications, dosage, instructions).
6. Save the visit. Finished consultations appear under the Finished tab.
7. Print or email prescription PDFs to the pet owner when needed.

9. Billing and Point of Sale

9.1 Billing

1. Open Billing from the sidebar.
2. Review open invoices and balances.
3. Click Receive payment to record partial or full payment.
4. Create a new invoice when billing outside the POS flow.

9.2 Point of Sale (POS)

1. Open Point of sale from the sidebar.
2. Add items from the procedure fee catalog and/or inventory products.
3. Apply quantities; stock is deducted for inventory items.
4. Complete checkout and print a receipt (desktop) or queue a print job (cloud).

10. Inventory

1. Open Inventory from the sidebar.
2. Browse categories: vaccines, medications, supplies, grooming, and services.
3. Update stock quantities and prices as needed.
4. Low-stock items should be reordered before they affect POS checkout.

11. Reminders

1. Open Reminders from the sidebar.
2. Create a PET reminder (vaccination, follow-up) or a GENERAL clinic announcement.
3. Select template or write a custom message; placeholders include owner and pet names.
4. Schedule the send date or dispatch due reminders (administrator).
5. Use the Reminders calendar for a visual schedule.

Email delivery requires configured mail settings (Gmail on desktop, Resend on cloud).

12. Reports (Administrator)

Administrators open Reports to view revenue summaries, charts by period, and operational metrics. Export summary PDFs for management review.

13. Settings and User Management (Administrator)

- Settings: clinic name, address, logo, receipt printer, Rx template, device lock, email test.
- Users and roles: create accounts, assign roles, reset passwords.
- Activity logs: review audit trail of system actions.
- Recycle bin: restore or permanently delete soft-deleted records.

14. Troubleshooting

Problem	Suggested action
Cannot connect to backend	Check internet; on cloud wait for server wake-up; contact admin
Wrong role after login	Select the role matching your account on the login screen
OTP not received	Check spam; ask admin (code may appear in admin notifications)
Receipt will not print	Desktop: verify printer in Settings; install print helper
Changes not visible	Refresh the page; confirm you saved the form successfully

15. Contact and Support

- Clinic phone: 0968 633 2940
- Address: 322 Quirino Avenue, Brgy. Don Galo, Paranaque City
- In-app help: Help and support module (all roles)

Tip: Complete a full test appointment and consultation in a training environment before go-live.
